

Our Purpose:

Turn Raw Potential Into Real Progress

To Whom it May Concern,

Bob Miller from RJM Conveyor Services for the past 3 years has been contracted to complete the QA on Alcoa's overland conveyor belt splicing. In this time working with Bob, he has always conducted himself professionally and has an excellent knowledge of conveyor belt splicing and flaking. His communication, attention to detail and supplying documentation of the QA is of the highest standard.

Bob always has a "Can do" attitude and is very flexible to the requirements of the work scope to ensure the work is completed on time and budget.

Bob is Alcoa's preferred belt splicing QA Inspector, and I would highly recommend him to others seeking a professional in his area of expertise.

Yours sincerely

Michael White

Fixed Plant Mechanical Project Supervisor
