RE: RJM Conveyor Services.

I have engaged the services of Bob Miller on numerous occasions most recently in my capacity of Head of Sempertrans in Australia.

Bob was engaged by Sempertrans for the First Quantum Minerals Shoemaker Levy overland conveyor system which was a 19000 meters overland system running from the new SML pit to the existing processing plant.

As Sempertrans were warranting the 23 splices on the system Bobs role was to oversee the splicing and ensure the splices were carried out to the specifications required by Sempertrans.

The project ran from January 2018 to around July 2018 over three mobilisations.

I found Bob to be extremely diligent in all aspects of the installation and provided an invaluable liaison between the head contractor, site, the installation crew, and ourselves.

Although a complicated installation the project from an installation perspective went to plan and the system continues to run today without issue.

I would have no hesitation in recommending RJM Conveyor Services and Bob Miller for any similar work.

Please feel free to contact me should you require any further information.

Regards

Bill Greenshields
